## OverView

Our platform is designed to help administrators managing their school in terms of techers, students and classes, as well as helping professors check kid's education and development in a simple and efficient way, and for parents they can in any time enter the plateform to watch their children notes added by teachers.

## Why Choose Us ?

Our website give a varity of features that can help you managing your kindergarten with less efforts possible

### Class Management

This feature would allow administrators and teachers to manage classes, including adding or removing students, updating student information, and assigning teachers to classes.

### Activity Planning

This feature would allow teachers to create and schedule activities for their classes, so that there will be no static activities for all of the year.

### Students Tracking

This feature would allow teachers to track student progress and performance, using our notes system, the teachers will be capable to give some comments to each children based on their progress.

### Accounts Creating

Using this feature, The administrator will be capable to give access to every teacher or parent so that they can enter and do what they can do in your kindergarten

## Client feedback

Here is a unit of one of our clients' feedback about the experience in our website

"School Managing Has Never Been Easier Before!"

I was suffering from exausting work every single day managing the whole school, but no anymore!

Mohamed Moustaghfir

Champions Kindergartens Director
